# Aman Sharma

**LinkedIn:** linkedin.com/in/amansharma **Email:** shreeaman1@gmail.com
**GitHub:** github.com/amandollar **Mobile:** +91 6206103436

## Skills

**Languages:** JavaScript (ES6+), TypeScript, Java
**Frontend:** React.js, Next.js (App Router, SSR/ISR), Tailwind CSS
**Backend:** Node.js, Express.js, REST APIs, JWT, RBAC, WebSockets, Webhooks
**Databases:** MongoDB (Indexing, Aggregation), MySQL
**DevOps & Tools:** Docker, Git, GitHub Actions, CI/CD, Vercel, NPM, Jest

## Internship

**Dhoonki – E-commerce Startup** Jul 25 – Jan 26
SDE Intern

- Refactored monolithic React + TypeScript codebase into modular architecture, reducing production bundle size by 30%.
- Improved Core Web Vitals (LCP, CLS) using lazy loading, memoization, API caching, and asset optimization reduced load time by 35%.
- Engineered real-time order tracking integrating eKart REST APIs with retry strategies and structured error handling.
- Built centralized API abstraction layer maintaining 99.5% service uptime across workflows.

**NamasteDev – Online Practice Platform** Aug 25 – Dec 25
Technical Content Contributor

- Authored 20+ React-based algorithmic challenges emphasizing time and space complexity optimization.
- Developed automated validation suites using Jest with deterministic grading logic.
- Collaborated with senior engineers to maintain structured learning standards.

**Rowh (rowh.in) – Beauty E-commerce** Jan26 – Feb 26

- Architected backend APIs using Next.js route handlers for order management, payments, and shipment workflows, integrating Razorpay with secure verification and automated reconciliation.
- Designed optimized relational database schemas with SQL indexing and managed the full transactional order lifecycle (cart → payment → shipment) ensuring data consistency in production.

## Projects

**EventViewz – Production Event SaaS**—Live Aug 25 – Dec 25

- Built multi-tenant event management platform serving 3,000+ users with 80,000+ page views under production load.
- Implemented secure RBAC authentication, ticketing, payment workflows, and automated reconciliation via Razorpay webhooks.
- Optimized CDN-based media delivery reducing image latency by 60%.
- Containerized services and deaployed via CI/CD ensuring stable production releases.
- **Tech Stack:** Next.js, TypeScript, Express.js, MongoDB, Razorpay, Cloudinary, Docker

**DocIt – AI-Powered Document Intelligence Platform—Live** Feb 26

- Architected full-stack AI document management system with role-based workspaces and secure file pipelines.
- Implemented vector-based retrieval pipeline using embeddings and similarity search for contextual Q&A.
- Integrated AI summarization and contextual querying via Vercel AI SDK.
- Designed secure file upload pipeline using pre-signed S3 URLs and JWT-based authentication.
- **Tech Stack:** Next.js, React, TypeScript, Express.js, MongoDB, WebSockets, Vercel AI SDK, AWS S3

## Achievements

- Top 50 Under 50 – GirlScript Summer of Code 2025 (GSSOC) for open-source contributions.
- Published an NPM package adopted by the developer community.

## Education

**Lovely Professional University** Phagwara, Punjab
B.Tech CSE; CGPA: 7.4 Aug 23 – June 27

**Bal Mandir Senior Secondary School** Kishanganj, Bihar
Intermediate;CGPA: 7.5 Apr 20 – Mar 22
